

#WEAREDEV'S

Optimal Laravel DEV AI environment setup

> Žiga Benko

Who is this dude?

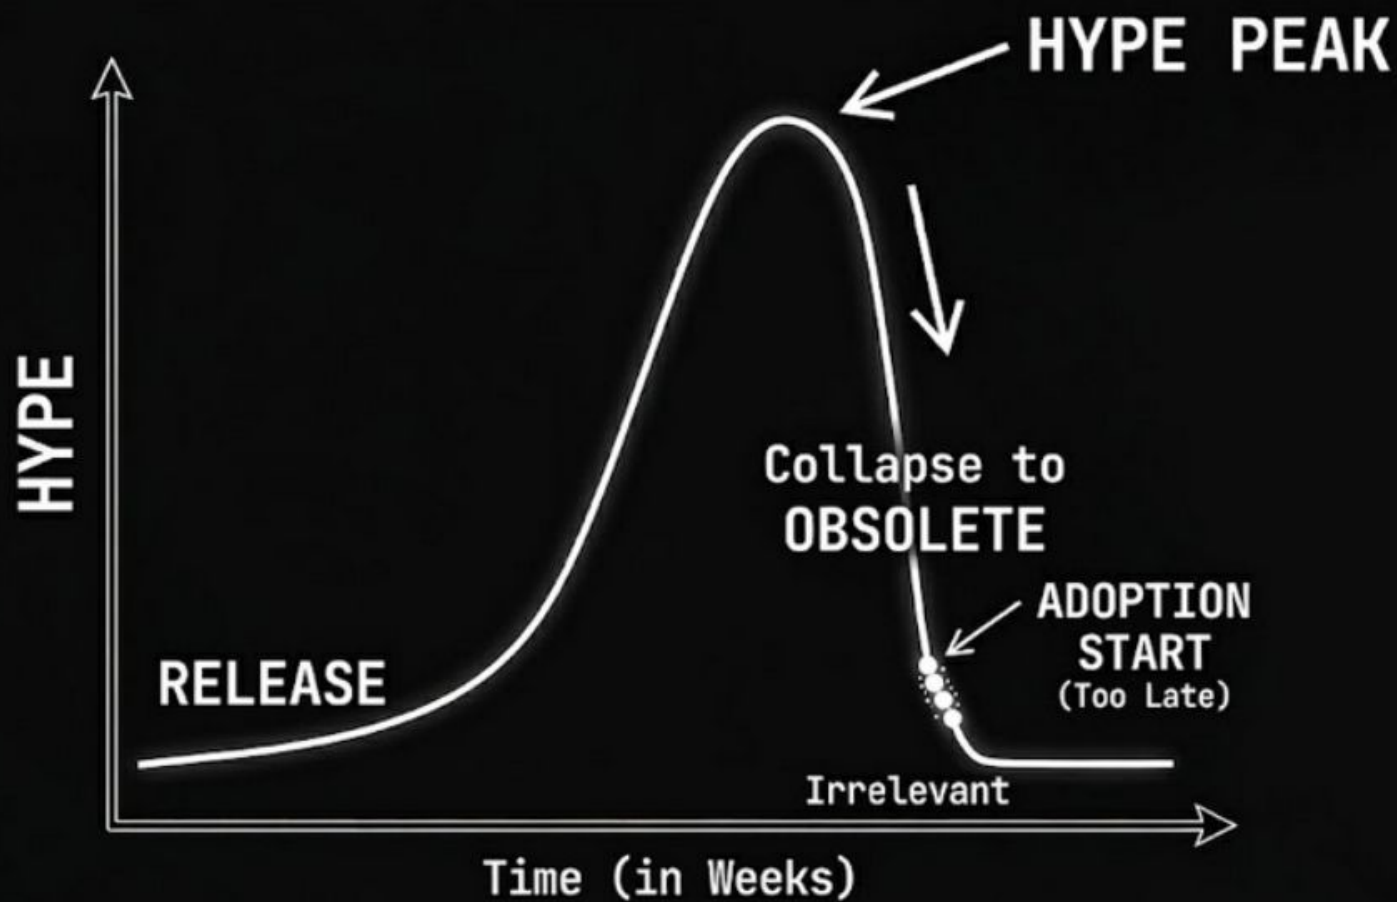

Žiga Benko

- > Software engineer 9+ years
- > Laravel developer 6+ years
- > Web development instructor
- > Bachelor of Computer Science
- > Co-founder
- > Indie hacker
- > Vibe coder

Raise your hands 🙌

What is optimal AI dev setup?

It depends...

Three worlds

Personal project

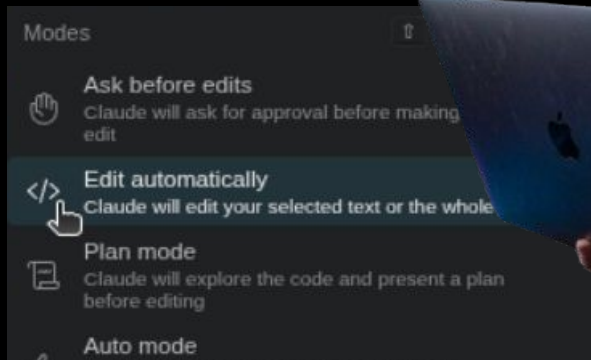

Startup

Corporation

Vibe Coding

“Small shit compounds over time.”

Vibe Coding

Personal project

- > Fast feature shipping
- > Automated tasks

Startup & Corporation

- > Amazing for design mockups
- > Great for proof of concepts

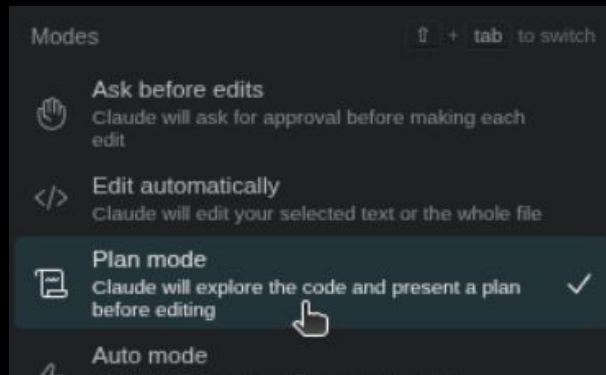

Vibe Coding

suggestions

- > Always setup the project manually
- > Setup solid foundation
- > Manage your context
- > Choose models wisely

Developer Driven AI

“The AI co-founder”

Developer Driven AI

- > Plan a solid architecture
- > Start with a Plan
- > Keep small tasks
- > Keep one conversation per feature

Compliance Driven AI

“Junior on a leash”

Compliance Driven AI

- > Bureaucracy
- > Huge context
- > Outdated tech stack
- > Endless documentation
- > Multiple huge teams
- > Keep one conversation per feature

MCP, Skill, CLAUDE.md, agent?

Laravel Boost

AI dev advice

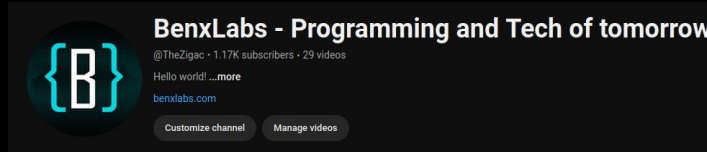

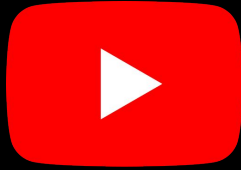

- > Update [CLAUDE.md](#) file regularly
- > Be explicit
- > Be an architect
- > Give examples
- > Invest time at the beginning
- > Write tests

AI use cases

- > Sentry issue fixer
- > Code reviewer
- > Translator
- > Security checker
- > Log reader
- > Idea tester

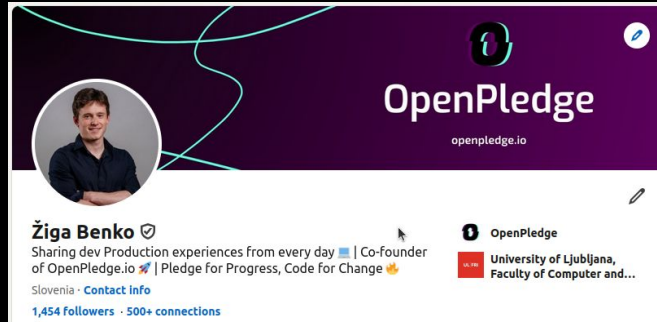

It's your turn 🙌
